

Clippership[®]

Enables users to achieve new levels of shipping automation, easily, efficiently and cost-effectively

Clippership

A Powerful, Windows-based Shipping Application:

- Multi-Carrier Compliance
- Electronic Manifesting
- Compliance Label Generation
- Rate Shopping
- Data Integration
- Reporting
- Printing Solutions

“With real-time access to a full range of shipping information, our service representatives are more informed and better equipped to handle customer inquiries.”

—Ed Johnson, IS Director, ROCKY Company

FEATURES

Multi-Carrier Compliance: Automate shipping for all carriers. Enjoy the benefits of full carrier compliance, including compliance labeling, reporting, and electronic manifesting.

Rate Shopping: To get the best carrier rates and services, you need to shop around. Clippership provides you with all the information you need to get the best shipping rate for every package you ship.

LTL Rating: Clippership's support of SMC3's RateWare® technology provides shippers with the most comprehensive system to manage compliance for parcel and LTL shipments. The solution offers a simplified process for updating LTL tariff information while the ability to rate shop across parcel and LTL carriers simplifies transportation decisions and reduces costs.

Integration into other Applications: One of the most important aspects of a shipping system is the degree to which it can integrate into your larger information environment. Using Kewill's integration tool, Kewill.Integrate, users can exchange information with virtually any other system and integrate with order processing systems, warehouse management applications or browser-based rating systems.

Reporting: Clippership can help you turn raw shipping data into incredibly useful management information. Clippership produces carrier manifest reports, as well as a number of standard reports that can be used for analysis and charge-back purposes.

Alternate Rates: Calculate and compare alternate rates based on criteria such as negotiated and retail rates. This feature is useful for determining potential markups.

Printing Solutions: Clippership supports forms and carrier-required documentation such as:

- Manifest reports
- Shipping, tracking and compliance labels
- DOCTag
- Invoices
- Export documents
- Custom forms

BENEFITS

Support for all major carriers:

- Airborne
- BAX Global
- DHL
- Menlo Forwarding
- FedEx Express and FedEx Ground
- UPS OnLine® Compatible
- US Postal Service

• Clippership can shop for the "best" carrier based on cost, as well as weight, zone, and zip code

- A simplified process for updating LTL tariff information
- Accurate decision-making on transportation pricing for both parcels and LTLs
- Ability to define various discounting methods for LTL carriers
- Ability to import more than 3,500 different Rate Modules offered by SMC 3
- Reduced labor cost through fewer manual processes
- Faster responses to shipping inquiries
- One system to manage all transportation needs

- Reduce customization costs and support
- Improve productivity by integrating new applications with corporate legacy systems
- Improve productivity by adding new features to standard applications
- Improve productivity with fast, trouble-free execution
- Improve reliability by leaving standard software applications intact
- Reduce the risk of losing long-term support of standard systems

• Clippership's report writer allows you to design your own reports, forms, and queries. You get the kind of information you need to properly monitor shipping activity, analyze costs, and identify future trends

- Stores alternate "retail" rates, while the manifest maintains the actual carrier charges
- Provides data that can be used to generate expenses
- While designed for pack and ship operations, this module also provides value for sophisticated billing applications. For example, you may want to ship Next Day Air, but bill your customer for Ground freight

- Supports multiple types of printers including LaserJet
- Enables users to manage multiple documents through one central system
- Labels already configured to meet carrier specifications
