ProShip® becomes a Certified SAP Integrated Application

MILWAUKEE, WI. Systems & Programming Solutions, Inc. (SPSI), a leading provider of shipping systems, announces that ProShip® has certified the Express Shipping Interface LE-XSI for SAP.

This SAP native integration to SAP extends customers' shipping functionality and visibility directly into SAP without the need for any custom code and provides real time shipping and tracking data access from within SAP. ProShip brings the most carrier compliant certifications from USPS, UPS, FedEx, DHL and many others that don't exist in native SAP. Enterprise users will benefit from ProShip's "best of class" shipping suite without ever having to leave the SAP application.

The Proship SAP Interface has been built, tested and certified using standard SAP functionality extending the full set of features of an enterprise class shipping software in a turn key solution. Using the existing XSI interface, ProShip allows users all the features without changing any of their existing data or business logic.

"The ProShip Suite product line integration to SAP is fast, robust and multi-carrier compliant." John Berg, Principal Partner of SPSI, notes, "The value of the ProShip Software Suite integrated with SAP is our ability to provide new services and meet carrier requirements much faster than anyone else in the industry."

The ProShip Software Suite is a tier one, enterprise class, multi-carrier shipping solution. ProShip Software is selected by Operations Managers most often because of speed, configurability and scalability. ProShip Software is chosen by IT Professionals because of ease of integration, open architecture, and extreme flexibility. Overall, ProShip software is voted "best of class" because ProShip is the most carrier-compliant software available, meaning ProShip not only offers more certified services from the major carriers, but provides availability to new services faster than anyone else.

Established in 1987, Systems & Programming Solutions, Inc. (SPSI) offers responsive and agile integrated business technology solutions that help our customers compete. SPSI is an IBM® Premier Business Partner, Microsoft® Gold Certified Partner and a Microsoft® Business Solutions Provider. SPSI has continually built an organization that aligns with customers' challenges by tailoring our approach to position and deliver solutions to the marketplace. We provide expertise in IT services and products for IBM mid-range, client/server, PC and network systems. SPSI offers solutions in software development, networking, training, virtualization, e-business, document/content management, technical support and hardware. SPSI's programming staff has an average of 20+ years experience and an average of 15+ years of service at SPSI. SPSI operates out of five strategically located offices including Milwaukee, Chicago, Madison, Minneapolis, and Cedar Rapids.

Our Distribution Systems practice focuses on warehousing, shipping, and integrated distribution solutions. Our group of Staffing Specialists provides candidates with the IT skills required for help desk resources or complex project initiatives or development.
